Academy

Results

- Since 2000 the number of people killed or injured on European roads has been reduced by 25% while the number of km driven by trucks increased by 20% %
- The European Directive EC59/2003 on professional driver qualification is in place from September 08/09 for respectively Cat. D and C drivers
- Whilst this shall help increase the knowledge and skills of professional drivers and therefore positively impact road safety, its implementation is complex and there is a lack of harmonisation

Page 26 (c) International Road Transport Union (IRU) 2010

IRU
Academy

Next Steps

- There is a strong need to harmonise, at the EU level, the qualification of road transport professionals
- The road transport industry needs high standard infrastructure. A focus should be placed on improved Safe Parking Areas in order to comply with regulation EC 561/2006 on Drive and Rest Time rules
- There is a need to harmonise enforcement rules & infringements
- The industry doesn't need more regulations and directives but it needs the incentives in order that the current legal requirements can be fulfilled efficiently and quickly
