

EETS will ease tolling for all ...

... and create a *win-win* situation

...to be solved *jointly*

There are lots of *open issues* ...

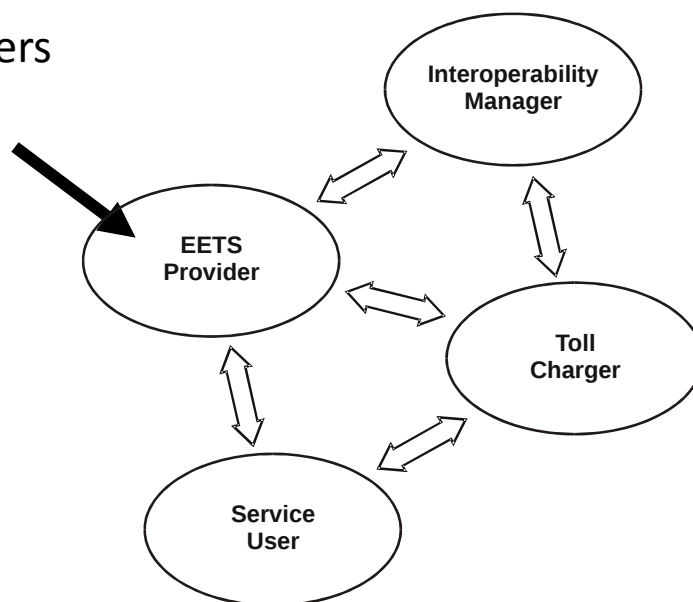

AETIS –

Association for Electronic Tolling and Interoperable Services The EETS Provider Association

Founding Members – potential EETS Providers

- Axxès
- DKV
- DVB LogPay
- Eurotoll
- OMV
- Ressa
- Shell
- Total
- UTA (via Trafineo)

Member Background

- Media
- RCI
- EG07
- ARENA
- CESARE IV
- Active providers of toll pmt services

AETIS - The EETS Provider Association

- statutes in process of signing
- founding planned Q4/2010
- To be located in Brussels

The Role of AETIS:
interest group and stakeholders
in the process of
setting up and
maintaining EETS

EETS...

So, where are we in the 18-month journey?

A number of potential EETS Providers ready to shoot...

but:

- The business case for EETS Providers is still not clear
- Little info available on preparations MS have made
- National toll schemes seem to be high on the agenda of MS, not EETS
- Some authorities or toll operators won't talk to us, until we are formally registered – can we invest „blind-folded?“

We need to jointly „sharpen“ the target:

- Toll Domains, notified bodies, national registers, **harmonized criteria** for EETS providers
- **Step-wise** (regional) **approach** vs European „big-bang“?
- **Migration path** needed, to move from existing toll schemes to EETS, as a “**parallel**” **world** would **be too expensive**.
- Everyone must pay a **price**, for the **benefits** they will get
- Only with an **open and constructive dialogue** between **all** EETS stakeholders, we can hit the goal.
