

EETS from a Dutch perspective

Dirk Grevink

23^o October 2009

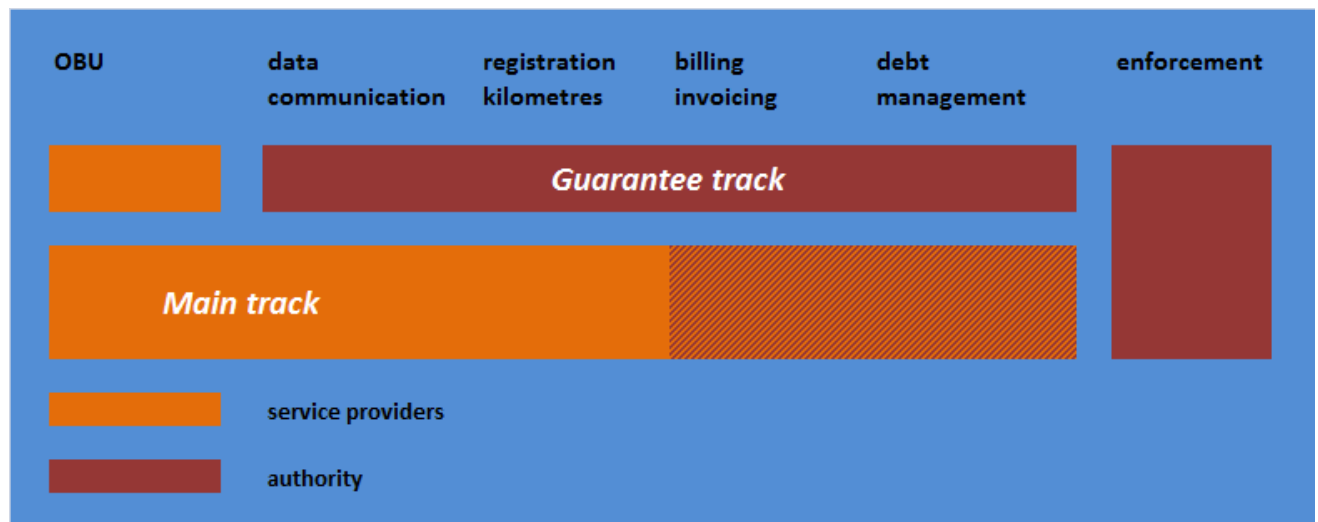

Road charging: traffic management

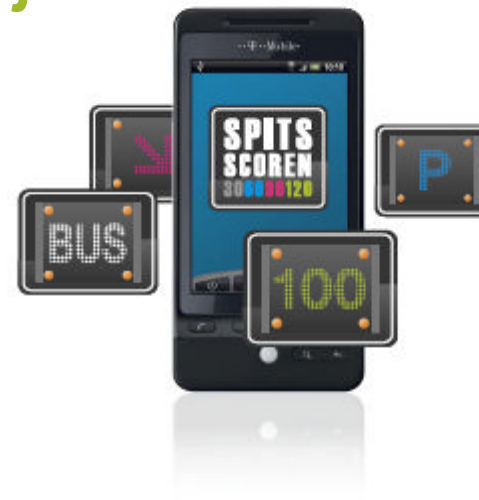

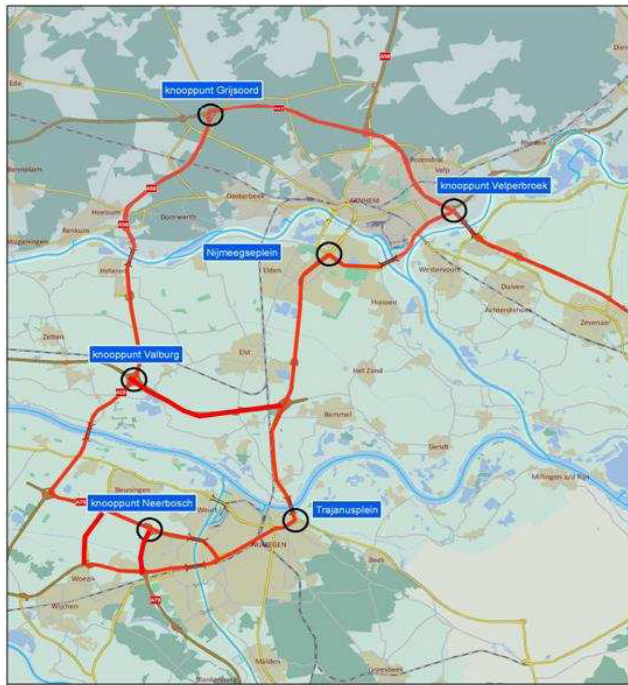

Tax policy: usage versus periodic possession tax.

All vehicles, all roads, differentiation in time, location and car characteristics

2012: Heavy vehicles; 2013-2016: passenger cars

6 Regional mobility projects

SpitsScoren G2 applicatie

EETS from a Dutch perspective

- Focus on mobility services for all customers!
- Services (i.c. business case) will dictate growth of market for a service provider not EU policy
- Technical standards will follow needed level of quality of services for customers
