The Austrian views on the „Valetta Declaration on Road Safety“

- ✓ Goals should be SMART
- ✓ They are decided together
- ✓ They are connected to indicators

Responsibility and time for implementation determined for every measure

*The Unknown Road Users:
How to understand and protect them?*

Old approach:
„65 % of the accidents are caused by the driver“

New approach:
„In 95 % of the accidents the driver was an influencing factor“

**Austria plans to make significant achievements in negotiations
FOR A FURTHER IMPROVEMENT OF ROAD SAFETY IN EUROPE!**

The Austrian Presidency will

- focus on the development of a transport-system for securing balanced competition
- go for a fair working- and social environment in the transport sector
- contribute to a sustainable and climate compliant mobility
- intensively follow the Dossiers of the Mobility Package
- of course try to further improve Road Safety!

Austria will hold an informal Council of the Ministers of Transport and the Ministers of the Environment at the end of October which will focus on Decarbonization and E-Mobility

... and finally a **sincere invitation to all of you!**

The Austrian Federal Ministry of Transport, Innovation and Technology is pleased to announce an
