Toll road network in Austria

— Toll sticker (Annual toll sticker, two month toll sticker, ten day toll sticker) or GO-Box Route toll or GO-Box
— Streckenmaut
 Total length of the route network: Approx. 2.223 km | Status: July 2017

Key Figures ASFINAG

- Length of network: **2,223 km**
- Lane kilometres: **12,042 km**
- Tunnels: **166**
- Kilometres in tunnels: **401**
- Bridges: **5,192**
- Motorway operation and maintenance facilities: **43**
- Traffic Management Center: **9**

**33 Billion vehicle
km / year**

ASFINAG Road Safety Programme 2020

Mission Statement

“We aim to make Austria’s motorways the safest in Europe”

Operational Goal

“50% reduction of fatalities by 2020”

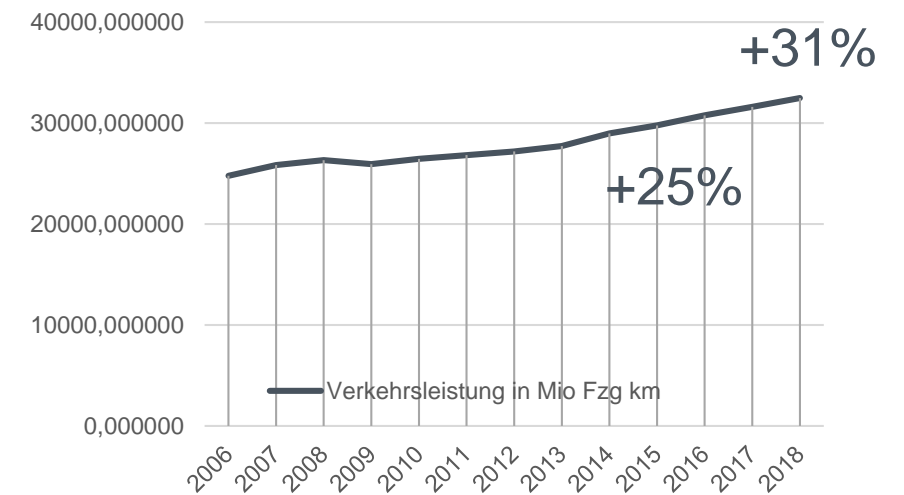

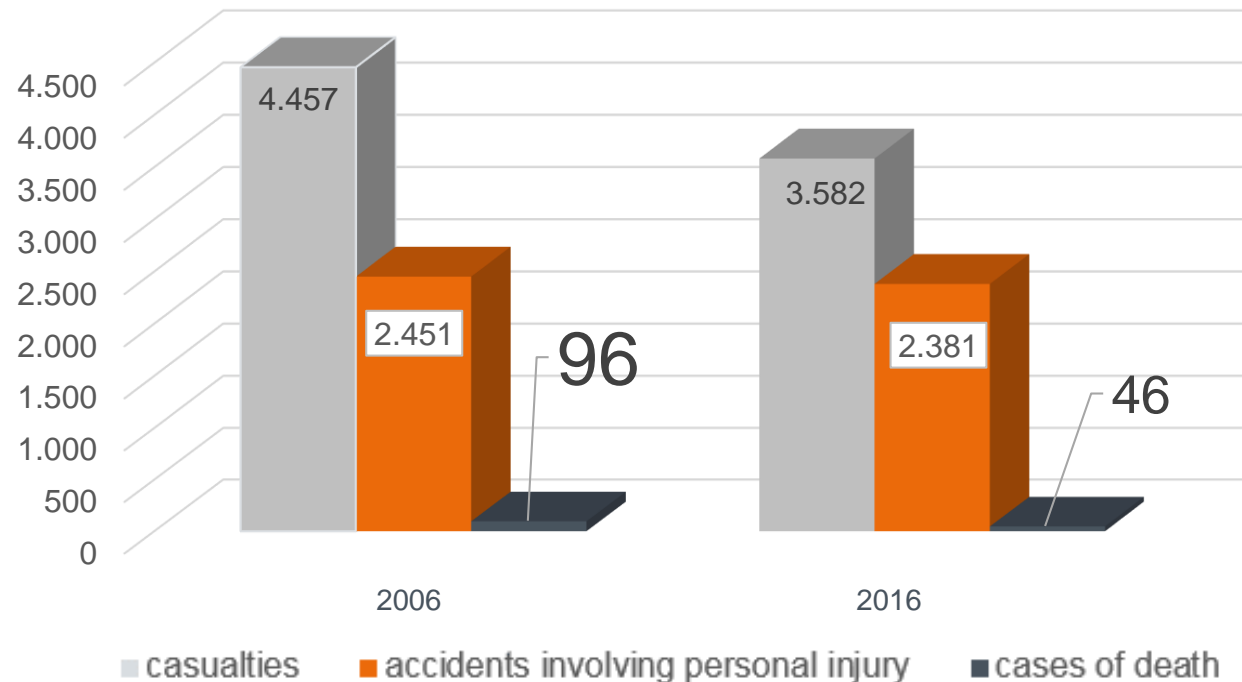

**130 Measures with
32 Priorities in
13 Action areas**

Road Safety

Accident figures show a positive trend in the last ten years!

A reduction in the number of road accidents and casualties confirms the positive impact of systematic measures aimed at increasing road safety.

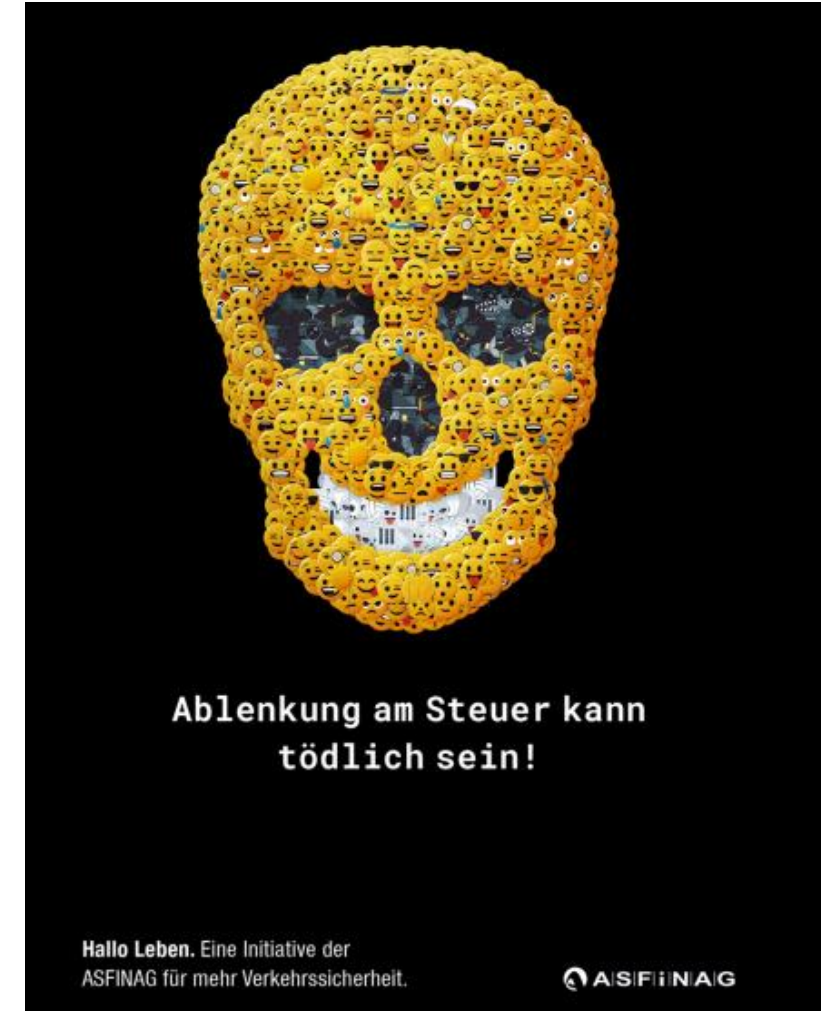

Distraction: Number 1 Cause of Accident on Motorways!

40% of all accidents with casualties or fatalities are caused by distraction or lack of concentration!

PIARC 2016 – Distraction and Fatigue

Distracted driving can be defined as an insufficient attention to the driving task as a result of some competing activity occupying the conscious attention of the driver (adapted from Carsten, 2014). This definition excludes fatigue as fatigue lowers the total amount of conscious attention available to the driver, to zero in the case of sleep.

Sources of distraction

➤ More than 131 possibilities (Source KfV)

Sources of distraction

Mobile phone is the most significant source of distraction in car driving!
