

JACQUELINE ERHART

Jacqueline Erhart is leading the ASECAP Permanent Committee on ITS and Innovation (Coper 3). She is employed by ASFINAG, the Austrian Operators of the High-Level Road Network, as Program Manager for Cooperative, Connected and Automated Systems and Services. She is involved in ERTRAC (WG CAD) and CEDR (WG CAD) and was Co-Lead of the working group “Physical and Digital Infrastructure” of CARTRE.

Ms. Erhart graduated from the Vienna University of Technology in Engineering Physics and worked for several years in experimental research and automotive industry. She is involved in many European R&D activities in the field of Transport and

Traffic Telematics with the scope of traffic management and ITS services for mixed traffic and CCAD requirements on physical and digital infrastructure.
